

Flex Necks

MIG Welding Accessory

Issued Oct. 2011 • SPEC FN-1.2

The Right Tool for the Job.

To improve comfort and minimize downtime, we offer a wide variety of interchangeable necks for greater flexibility and better weld puddle visibility.

Bernard Flex Neck

See neck spec sheet for details on our complete offering of interchangeable necks.

Easily adjusted to fit any angle and save time and money for changing out an inventorying expensive specialty guns.

Fit all Q-Guns™ and S-Guns™ - from 150 - 600 Amps.

Changeover and rotate without tools.

Stay-Tite™ connection improves conductivity for better weld quality, lessens heat to increase operator comfort.

Available in 6" and 8" lengths for improved operator comfort with limited access positions.

Easily removable for Jump Liner changeover.

Stay-Tite™ Technology

Long-lasting power cable compression fittings and necks with large tapered gun connections combine to form the foundation of Bernard® Stay-Tite™ technology. This technology ensures optimal conductivity to increase weld consistency and lessen heat output while improving product durability.

Available Flex Necks & Installation Instructions

CAUTION

- Allow neck to cool before removing or installing gas diffuser!
- Do not overtighten diffuser onto flex-neck!
- Excessive tightening/twisting can lead to premature failure!

IMPORTANT! Use two hands to bend the flexible head assembly as shown.
